Project Udyam Digital

Making Small Businesses Go Digital in One Sitting

Focus : Kirana & MSME Onboarding

Core Breakthrough : Multi-Vendor Friction to One Flow

Platform Partner unstop

THE CUSTOMER REALITY

Meet Rajesh. He Runs a Business, Not an IT Department.

Rajesh is an illustrative kirana owner, not a real testimonial. He needs connectivity, billing, payments, inventory, customer communication and security.

A BROKEN SIX-STEP ORDEAL

1. Contacts multiple vendors
2. Repeats his requirements
3. Waits 3–5 days for confusing PDF quotes
4. Repeats documentation and KYC
5. Calls for installation updates
6. Abandons or buys only part of the solution

He needs one simple way to digitize his entire business.

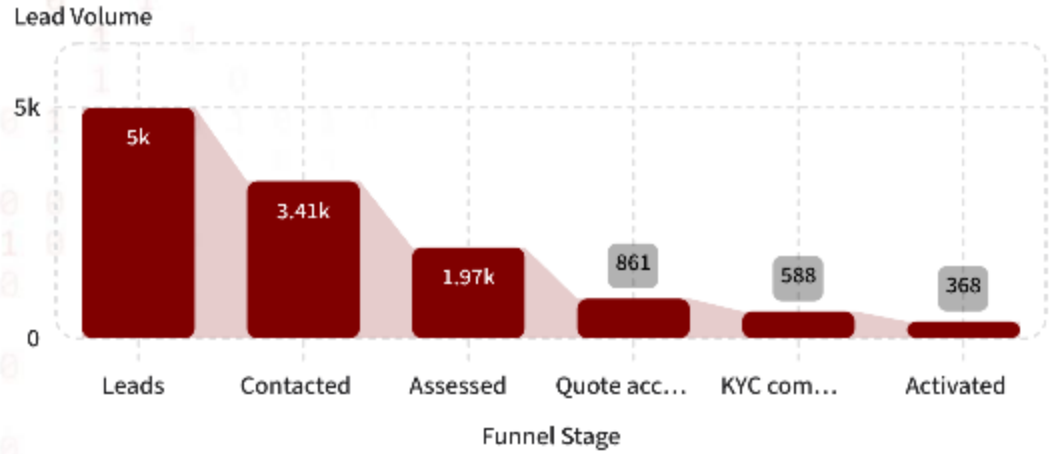

BASELINE FUNNEL AUDIT

The Problem Is Not Demand. It Is Conversion.

5,000-lead conversion funnel

7.36%

Total conversion rate

5,000 leads → 3,406 contacted (68.1%) → 1,974 assessed (39.5%) → 861 quotes accepted → 588 KYC completed → 368 activated.

56.4% drop-off

From needs assessed to quote accepted. Pricing uncertainty, delayed PDF quotes and fragmented offerings create friction.

7.36% lead-to-activation

GSTIN leads convert at **9.6%** versus **2.0%** for non-GSTIN leads.

Historical Baseline: 17.6 days onboarding · 3+ follow-up calls · ₹15,000 CAC · 15.2% six-month churn (smb_leads.csv).

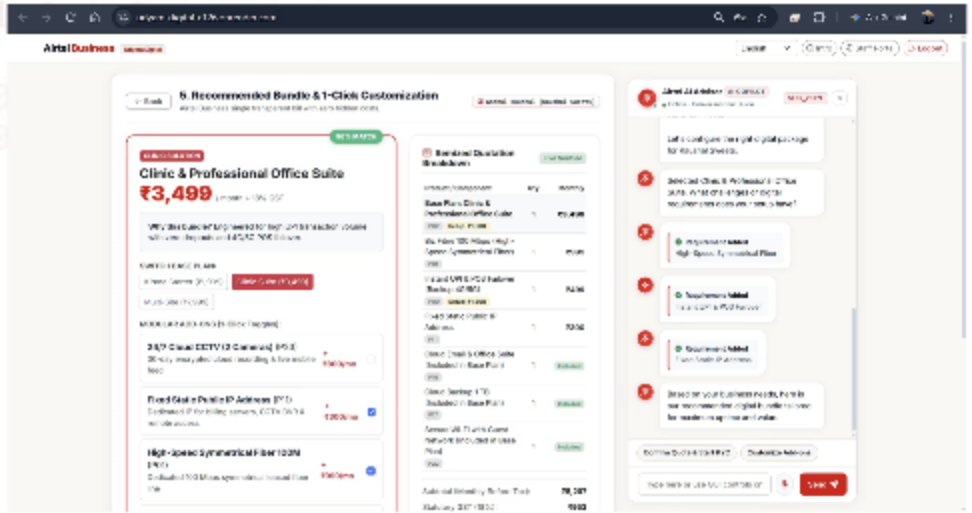

UNIFIED ARCHITECTURE

Introducing Project Udyam Digital

Consumer Portal → Udyam Intelligence Engine → Airtel Control & Partner Desk

Live Consumer App · Live Control Portal · GitHub Repository

Prototype interface evidence

Implemented in prototype (simulated registry & verification lookups).

Mobile-First Consumer Portal [Implemented in Prototype]
Hindi, Hinglish and English advisor; discovery, bundle recommendations, itemized quote, digital KYC (automated & manual choices) and order tracking.

Udyam Intelligence Engine [Implemented in Prototype]
Rule-based requirements mapping, 25-product catalogue, recommendations and real-time quotation (18% GST); mock GSTIN & Udyam verification and order lifecycle.

Airtel Control & Partner Desk [Implemented in Prototype]
Funnel analytics, rules-based quote recovery, officer KYC review desk, partner QR attribution, quotes and ₹1,500 activation commission ledger.

END-TO-END CUSTOMER EXPERIENCE

From Namaste to Digital Activation — In One Guided Journey

THE GUIDED JOURNEY

1. **Discover** · Hindi, Hinglish and English; three questions map needs to a 25-product catalogue.
2. **Recommend** · Business-specific recommendations and four bundles.
3. **Quote** · Modular add-ons, real-time itemized pricing and 18% GST where applicable.
4. **Verify** · Mock GSTIN and Udyam lookups; document extraction and validation; utility bill under 90 days; instant or officer review; bilingual DPDP consent.
5. **Activate** · Order Created → KYC Approved → Equipment Dispatched → Fiber Splicing → Live Activation.

CURATED SECTOR SOLUTIONS

Kirana Digital Starter
₹1,999/month · Contract: 12 Months

5G AirFiber 100 Mbps, POS 4G Backup SIM, WhatsApp Business API, Secure Wi-Fi.

Clinic & CA Professional Suite
₹3,499/month · Contract: 12 Months

Symmetrical Fiber 300 Mbps, 1TB Cloud Backup, Google Workspace, Cyber Protect.

Retail Pro Multi-Site
₹7,999/month · Contract: 24 Months

Fiber 1 Gbps, SD-WAN Failover, 4x Cloud CCTV, Managed Firewall.

Manufacturing Edge
₹14,999/month · Contract: 24 Months

Leased Line/MPLS, Industrial IoT, Remote ERP Connectivity.

OPERATIONAL FLYWHEEL

Build a Scalable Acquisition Engine

Quote Recovery

Explainable 8-class objection taxonomy and rules-based recovery scoring for 1,113 historical quote-stage losses, with rescue scripts and one-click quote-resume links.

Assisted Partners

QR referral attribution, assisted lead rescue, and a ₹1,500 commission after activation. The ledger tracks Pending → Eligible → Approved → Paid. 10,000+ is the addressable local network, not onboarded partners.

Smart KYC & Ops

Prototype document extraction & validation (<90d utility recency), dual verification choices (automated vs officer review), affirmative DPDP consent, and Operations Intelligence explainable installation delay risk scoring.

THE CONTINUOUS OPERATING CYCLE

Discover → | **Recommend →** | **Quote →** | **Verify →** | **Activate →** | **Learn & Recover**

PROJECTED BUSINESS IMPACT

From 7.36% Conversion to a 22% Target

Targets for a simpler, faster MSME acquisition journey.

Operating metric	Historical baseline	Project target	Projected impact
Funnel conversion	7.36% (368 / 5,000)	22.0%	~3× expansion
Activation TAT	17.6 days avg	3.5 days	80% reduction
Acquisition cost (CAC)	₹15,000 / activation	₹3,800	~75% reduction
Six-month churn	15.2% (smb_leads.csv)	4.8% (team model)	~68% reduction
Customer follow-up calls	3+ calls / lead	< 0.2 calls	Near-zero touch

Historical baseline: smb_leads.csv. Targets/projections only; no production results. Churn target is a team-model assumption.

THE VISION

Project Udyam Digital

Making Bharat's MSMEs Go Digital in One Sitting.

Platform Partner unstop

Proposed Rollout & Key Risks

Illustrative rollout assumptions; prototype features and launch controls are labeled separately.

3-PHASE EXECUTION ROADMAP

Pilot Gating, Partner Rollout & Scale

Phase 1: Controlled Pilot (Months 1–3)

- Scope: 500 Kirana & Clinic MSMEs across Top 5 Metro circles.
- Focus: Validate digital KYC pass rates, mobile self-serve UX, & advisor.
- Gate: Conversion >15%, KYC first-pass rate >70%, TAT <5 days.

Phase 2: Regional Cluster Expansion (Months 4–6)

- Scope: Expansion into Tier-2 clusters with partner-assisted QR acquisition.
- Focus: Partner Desk, ₹1,500 activation commission ledger, & Quote Recovery.
- Gate: 1,000 active partner agents, quote recovery lift >15%.

Phase 3: National Scale-Up (Months 7–12)

- Scope: Commercial launch across all Airtel Business circles.
- Focus: Self-serve onboarding, automated dispatch, & OSS/BSS billing sync.
- Gate: Blended CAC <₹4,500, activation TAT <3.5 days, follow-up calls <0.2.

Note: Planning assumptions and illustrative scenarios; gated on pilot performance.

KEY RISKS & RESPONSE

Prototype controls and launch assumptions

1. Partner Channel Conflict

Risk: Resellers may fear disintermediation.

Prototype: QR attribution + ₹1,500 only on activation; pilot terms need validation.

2. Digital & Language Barriers

Risk: Owners may find technical forms difficult.

Prototype: Guided text advisor in English, Hindi and Hinglish plus GUI choices. No voice/WhatsApp claim.

3. KYC Quality & Fraud

Risk: Documents may be expired, mismatched or unreadable.

Prototype: Mock registry checks and officer review route exceptions; they do not eliminate fraud.

4. Privacy & Security

Risk: Sensitive documents need safe handling.

Prototype: Consent, masking and role checks. Retention/purge need production validation.

5. Installation Delays

Risk: Site constraints can delay activation.

Prototype: Explainable risk flags support follow-up; they do not guarantee an SLA.

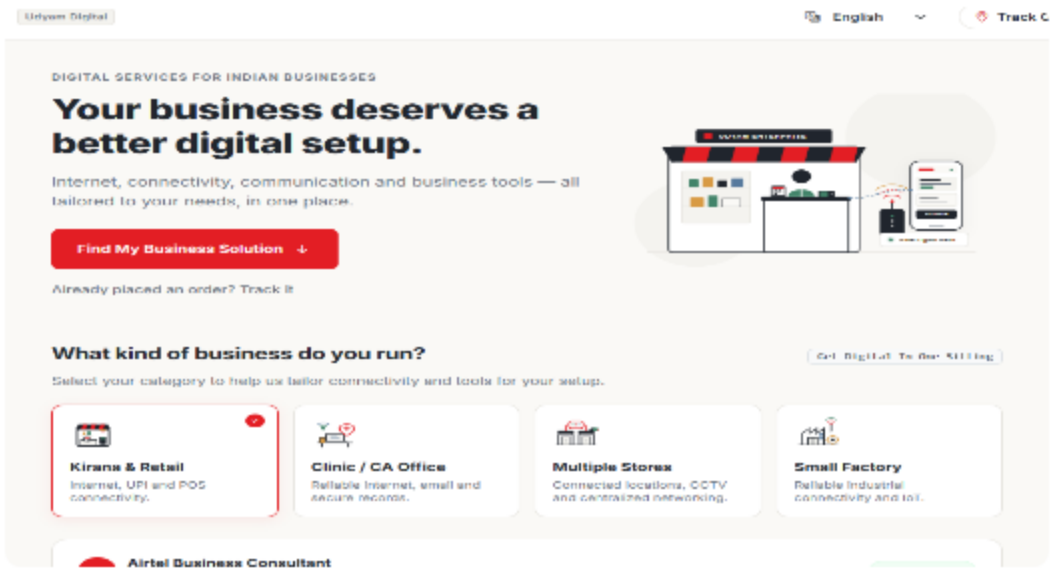

WATCH THE 3-MINUTE DEMO

Simple for customers. Clearer for Airtel teams.

A guided onboarding flow connects customer choices with dedicated staff work areas—without claiming unmeasured competitive results.

CUSTOMER SIDE

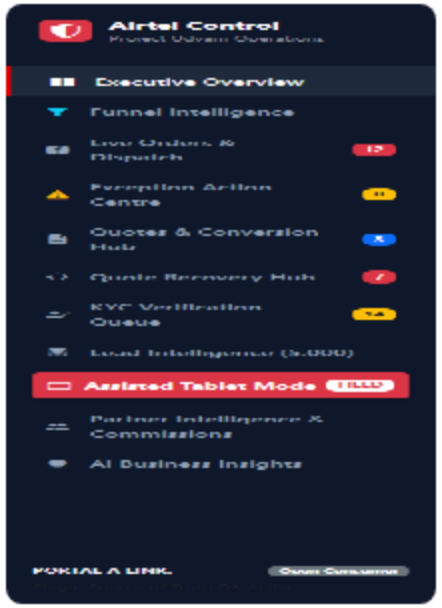

A guided start, in plain language

Choose a business type, describe a need, review a tailored bundle and quote, then continue to KYC and tracking.

AIRTEL TEAM SIDE

Work from clear operational queues

Orders & dispatch
KYC verification queue
Quote recovery
Exceptions & installation risk
Partner intelligence

Staff can move from status visibility to review and follow-up in the same control workspace. The portal screenshot's badges represent demo records.

What this demo shows: ease of guided onboarding and Airtel-side workflow visibility—not measured superiority over competitors.
