airtel

AIRTEL SYNC 2026 · DIGITAL TRACK (CASE & PROTOTYPE ROUND)

PROJECT UDYAM DIGITAL

Making India's 6.3 Crore MSMEs Go Digital in One Sitting

A mobile-first, GenAI-guided conversational onboarding platform that transforms slow, paper-heavy B2B telecom sales into a 15-minute digital journey with automated KYC and transparent bundling.

TEAM NAME: Halo | CAMPUS: Thapar Institute of Engineering & Technology

AIRTEL SYNC 2026 · DIGITAL TRACK | DATE: November 2026

+200% Conversion Lift
7.36% -> 22.0% Net Conv.

80% TAT Reduction
17.6 Days -> 3.5 Days

75% CAC Reduction
Rs 15,000 -> Rs 3,800

Platform Partner unstop

Funnel Diagnostic: The Rs 15k CAC & 17.6-Day Onboarding Crisis

EMPIRICAL CONVERSION FUNNEL (5,000 LEADS)

1. Leads Generated: 5,000 (100%)
└ Tier 1 & Tier 2 Cities

2. Contacted: 3,406 (68.1%)
└ 805 unreachable, 531 no time for visit

3. Needs Assessed: 1,974 (39.5%)
└ 470 not interested, 325 ISP locked

4. Quote Accepted: 861 (17.2%)
└ STEEPEST DROP: 56.4% collapse at quote!

5. KYC Complete: 588 (11.8%)
└ 173 drops: paperwork long / missing docs

6. Activated: 368 (7.36%)
└ 98 drops: install delayed >21 days

KEY STRUCTURAL BOTTLENECK ANALYSIS

- **Opaque, Multi-Day Quotes (56.4% Drop)**
Quotes take 3-5 days to prepare and arrive as confusing multi-page PDFs with telecom product SKUs. 621 leads dropped citing 'Price too high' or 'Competitor cheaper'.

- **Tedious Paperwork & Verification (31.7% Drop)**
Physical collection of GST, Udyam, utility bills, and signatory IDs causes severe merchant dropouts. GST-registered leads convert 4.8x higher (9.56% vs 2.05%).

- **Black-Hole Status Tracking & Churn (37.4% Drop)**
Customers wait 17.6 days on average and call 3+ times to chase status. 98 leads cancelled due to >21 day installation delays. Unsustainable blended CAC of Rs 15,000!

AIRTEL SYNC 2026 · DIGITAL TRACK

Competitive Landscape: Strategic Advantage of Project Udyam

Evaluation Metric	Incumbent Telcos (Jio Biz / Tata Tele)	Digital SaaS (Zoho / Khatabook)	Unorganized Local Vendors	Accel / Airtel (Project Udyam)
Full-Stack Offering	Connectivity only; apps sold via separate partners	Apps only (invoicing/CRM); no network/SIMs	Broadband or SIM only; zero SLA/support	**Unified: Connectivity + Cloud + SaaS + Security**
Onboarding Experience	Slow field rep visits; 3-5 day PDF quotes	Fast self-serve DIY, but limited to app setup	Doorstep cash deal, highly manual & fragmented	**15-Min Multilingual GenAI Advisor + Instant Quote**
KYC & Verification	Manual paper collection (GST, Udyam, ID proofs)	Self-certified email/mobile login (no DoT KYC)	Unverified SIMs / local broadband registration	**Automated Registry Lookup + OCR (<90d check)**
Billing & Support	Multiple bills per product; disjointed support	Fragmented credit card SaaS subscriptions	Multiple cash/UPI vendors with zero SLA	**Single Unified Bill + 24/7 Proactive SLA Tracker**

THE AIRTEL FULL-STACK MOAT:
SaaS players lack network infrastructure, and legacy telcos lack digital customer experience. Airtel owns the high-speed pipe (5G AirFiber/Biz Fibre) and bundles critical digital tools (Google Workspace, WhatsApp API, Cloud CCTV) on a SINGLE bill, slashing churn from 15.2% to <6%.

Approach: GenAI Discovery Engine & Rule-Based Bundling

1. CONVERSATIONAL BUSINESS DISCOVERY

- **Consultative Sales Experience in Regional Tongues**
  Behaves like an experienced Airtel MSME salesperson. Converses in Hindi, Hinglish, and English via Groq LLaMA 3.3 70B. 1 question at a time (5-25 words).
- **Adaptive 7-Category Needs Assessment**
  Extracts business category, employee count, branch count, payment failover needs, CCTV, and cloud tools without technical telecom jargon.
- **Deterministic Recommendation Rule Engine**
  LLM discovers needs; deterministic 5-factor scoring engine selects bundles from product_catalogue.csv. Kirana stores NEVER receive manufacturing suites.
- **Explainable Value & Honest Budget Advice**
  Directly explains why a bundle solves their exact pain point (e.g. UPI failover) and alerts if stated budget differs with down-tier alternatives.

2. 4 HERO BUNDLES & TRANSPARENT 18% GST

Kirana Digital Starter — Rs 1,999 / mo
Biz 5G AirFiber 100 + POS 4G Backup + WhatsApp API + UPI Guest Wi-Fi. Solves payment failure crisis in 2-day wireless setup.

Clinic & Office Suite — Rs 3,499 / mo
Biz Fibre 300 + Google Workspace + 1TB Cloud Backup + Secure Wi-Fi. 99.9% uptime for patient, legal & tax files.

Multi-Site Retail Pro — Rs 7,999 / mo
Biz Fibre 1G + SD-WAN + 4x Cloud CCTV + Managed Firewall. Centralized store management across cities.

Small Manufacturing Suite — Rs 14,999 / mo
1:1 Leased Line 100M + Cloud Voice + Telemetry + DDoS Shield. Dedicated industrial ERP connectivity.

Transparent Pricing: Itemized base, optional add-ons, exact 18% GST, and one-time setup fee with 1-click order creation — ZERO 5-day quote wait!

Smart KYC: Zero-Friction Verification & DPDP Compliance

1. Instant Registry APIs (Zero Manual Typing)

- **Mock GSTIN Registry API**
  Validates 15-char format (with 'X' check). Auto-populates Legal Name, Trade Name, Registered Address, and Active/Cancelled status in <500ms.
- **Mock Udyam Registry API**
  Validates 'UDYAM-XX-00-XXXXXXX' structure. Auto-verifies MSME enterprise classification (Micro, Small, Medium).
- **Direct Value**
  Eliminates 94 dropouts caused by missing or misplaced registration documents.

2. Cross-Field Validation & Exceptions (Actionable Error Resolution)

- **Deterministic 90-Day Rule**
  Strict benchmark: 15-Jul-2026. Flags K05 (186d old) & K11 (257d old) as expired; approves K02 (54d old) & K03 (46d old).
- **Resolution Anomaly Catchers**
  Detects low-res scans (K04 blur @ 38.5% confidence) & triggers re-upload prompt with 4-corner guide.
- **Bilingual Exception Guidance**
  Never displays 'KYC Failed'. Explains exact issue in English & Hindi (Cancelled GSTIN, old bill, or address mismatch).

3. DPDP Act, 2023 Compliance (Privacy-by-Design)

- **Explicit Bilingual Consent**
  Granular, unbundled consent modal in the customer's language before camera/document capture.
- **Strict Data Minimization**
  Collects solely statutory DoT telecom parameters. Zero hoarding of bank statements or unrelated financial files.
- **PII Masking & Purging**
  PAN and Aadhaar numbers masked in logs/UI (e.g. 27AAAAA****1ZX). Raw documents encrypted at rest (AES-256) and purged post-verification.

Assisted Partner Ecosystem & AI Quote Recovery Engine

1. AI QUOTE RECOVERY ENGINE (1,113 LEADS)

- **8-Class Objection Classifier & Priority Scoring**
  Analyzes abandonments across price, competitor, complexity, missing features, and SLA. Dynamic priority score (0-100) ranks high-value recoverable deals.
- **Down-Tiering & Catalogue Add-on Solver**
  Detects budget mismatches and suggests viable alternative bundles (e.g. ₹1,999 Kirana plan) or matching add-ons (Cloud CCTV, Static IP) with single-click quotation update.
- **Contextual AI Outreach Generator**
  Generates empathetic, natural WhatsApp and email drafts in Hindi and English with plain-language talking points for field and desk agents.
- **Secure Re-Entry Tokens & DPDP Opt-Out**
  Allows merchants to resume saved quotes via 1-click expiring links. Enforces explicit DPDP 2023 opt-out with permanent communication suppression.

2. ASSISTED PARTNER ECOSYSTEM & COMMISSIONS

- **Dual-Aspect Assisted Tablet Mode**
  Empowers Airtel field reps and local partners on visits: Customer Canvas (left 60%) for simple discovery + Private Partner AI Sales Co-Pilot (right 40%).
- **Consultative Coaching & Hindi Field Prompts**
  Co-pilot generates live consultative questions in Hindi/Hinglish, handles price/complexity rebuttals, and checks satisfied vs unmet needs.
- **Branded Dynamic QR & 30-Day First-Touch Lock**
  Offline SVG QR codes and referral links attribute merchants with 30-day first-touch protection, preventing partner commission conflict.
- **Activation-Gated Ledger (Rs 1,500 Parameter)**
  Zero payout risk: commission is stamped 'pending' upon order, unlocked to 'eligible' strictly on Step 5 installation activation, with admin RBAC.

AIRTEL SYNC 2026 · DIGITAL TRACK

Business Impact, Unit Economics & Phased Rollout Roadmap

Lead Conversion
7.36% -> 25.0%
+240% lift via pricing & recovery

Activation TAT
17.6d -> 2.8 Days
-84% via Smart KYC & pre-feasibility

Blended CAC
Rs 15,000 -> Rs 6,850
-54.3% via digital self-serve

Chase Calls
3.01 -> 0.2 Calls
-93% via proactive milestone tracking

TRANSFORMATIVE UNIT ECONOMICS

- **CAC Payback Period:**
Drops from 6.0 months (Rs 15,000 / Rs 2,500 ARPU) to 1.8 months (Rs 6,850 CAC / Rs 3,850 blended ARPU).
- **LTV / CAC Ratio:**
Jumps from 2.1x to 9.4x driven by 4 hero bundles and churn reduction from 15.2% to <5%.
- **Incremental Annual Revenue:**
Capturing 940 activations vs 368 baseline yields +Rs 2.64 Crore incremental annualized B2B revenue.

3-PHASE EXECUTION ROADMAP

- **Operations Command Centre**
Predictive risk engine monitors bundle SLAs (Kirana 2d, Clinic 3d, Pro 7d, Mfg 14d) with unified exception action queue.
- **Phase 1: Pilot Launch (M1-M3)**
Deploy Web & WhatsApp advisor in 5 top Tier 1 cities (NCR, Mumbai, Bengaluru, Hyderabad, Chennai) targeting Kirana & Clinic segments.
- **Phase 2 & 3: Scale & Expand (M4-M12)**
Scale to 25 Tier 2 industrial hubs with 5,000 assisted partners and AI what-if scenario simulations.
