airtel

AIRTEL SYNC 2026 · DIGITAL TRACK (CASE & PROTOTYPE ROUND)

PROJECT UDYAM DIGITAL

Making India's 6.3 Crore MSMEs Go Digital in One Sitting

A mobile-first, GenAI-guided conversational onboarding platform that transforms slow, paper-heavy B2B telecom sales into a 15-minute digital journey with automated KYC and transparent bundling.

TEAM NAME: Team Innovators | CAMPUS: National Institute of Technology
MEMBERS: Anshuman Kumar (CS) & Collaborator (AI/IT) | DATE: November 2026

+200% Conversion Lift
7.36% -> 22.0% Net Conv.

80% TAT Reduction
17.6 Days -> 3.5 Days

75% CAC Reduction
Rs 15,000 -> Rs 3,800

Platform Partner unstop

Funnel Diagnostic: The Rs 15k CAC & 17.6-Day Onboarding Crisis

EMPIRICAL CONVERSION FUNNEL (5,000 LEADS)

1. Leads Generated: 5,000 (100%)
└ Tier 1 & Tier 2 Cities

2. Contacted: 3,406 (68.1%)
└ 805 unreachable, 531 no time for visit

3. Needs Assessed: 1,974 (39.5%)
└ 470 not interested, 325 ISP locked

4. Quote Accepted: 861 (17.2%)
└ STEEPEST DROP: 56.4% collapse at quote!

5. KYC Complete: 588 (11.8%)
└ 173 drops: paperwork long / missing docs

6. Activated: 368 (7.36%)
└ 98 drops: install delayed >21 days

KEY STRUCTURAL BOTTLENECK ANALYSIS

- **Opaque, Multi-Day Quotes (56.4% Drop)**
Quotes take 3-5 days to prepare and arrive as confusing multi-page PDFs with telecom product SKUs. 621 leads dropped citing 'Price too high' or 'Competitor cheaper'.

- **Tedious Paperwork & Verification (31.7% Drop)**
Physical collection of GST, Udyam, utility bills, and signatory IDs causes severe merchant dropouts. GST-registered leads convert 4.8x higher (9.56% vs 2.05%).

- **Black-Hole Status Tracking & Churn (37.4% Drop)**
Customers wait 17.6 days on average and call 3+ times to chase status. 98 leads cancelled due to >21 day installation delays. Unsustainable blended CAC of Rs 15,000!

AIRTEL SYNC 2026 · DIGITAL TRACK

Competitive Landscape: Strategic Advantage of Project Udyam

Evaluation Metric	Incumbent Telcos (Jio Biz / Tata Tele)	Digital SaaS (Zoho / Khatabook)	Unorganized Local Vendors	Accel / Airtel (Project Udyam)
Full-Stack Offering	Connectivity only; apps sold via separate partners	Apps only (invoicing/CRM); no network/SIMs	Broadband or SIM only; zero SLA/support	**Unified: Connectivity + Cloud + SaaS + Security**
Onboarding Experience	Slow field rep visits; 3-5 day PDF quotes	Fast self-serve DIY, but limited to app setup	Doorstep cash deal, highly manual & fragmented	**15-Min Multilingual GenAI Advisor + Instant Quote**
KYC & Verification	Manual paper collection (GST, Udyam, ID proofs)	Self-certified email/mobile login (no DoT KYC)	Unverified SIMs / local broadband registration	**Automated Registry Lookup + OCR (<90d check)**
Billing & Support	Multiple bills per product; disjointed support	Fragmented credit card SaaS subscriptions	Multiple cash/UPI vendors with zero SLA	**Single Unified Bill + 24/7 Proactive SLA Tracker**

THE AIRTEL FULL-STACK MOAT:
SaaS players lack network infrastructure, and legacy telcos lack digital customer experience. Airtel owns the high-speed pipe (5G AirFiber/Biz Fibre) and bundles critical digital tools (Google Workspace, WhatsApp API, Cloud CCTV) on a SINGLE bill, slashing churn from 15.2% to <6%.

Approach: GenAI Conversational Advisor & 1-Click Bundling

1. MULTILINGUAL GENAI ADVISOR

- **Conversational Discovery in Regional Tongues**
  Engages MSME owners on WhatsApp/Web in Hindi, Hinglish, Tamil, Telugu, and English. No telecom technical jargon.

- **3-Question Intuitive Assessment**
  1. Business type & segment (Kirana, Clinic, CA firm)
  2. Staff count & number of branch sites
  3. Current digital tools & primary pain points

- **Dynamic Rule Engine Mapping**
  Matches needs against product_catalogue.csv rules (available_city_tiers, min_employees, dependencies).

- **Plain-Language Value Explanation**
  'For your 4-doctor clinic, Biz Fibre 300 gives uninterrupted Wi-Fi, while 1TB Cloud Backup keeps patient data safe.'

2. CURATED 1-CLICK HERO BUNDLES

Kirana Digital Starter — Rs 1,999 / month
Biz 5G AirFiber 100 (P04) + POS 4G Backup (P09) + WhatsApp API (P15) + UPI Guest Wi-Fi (P22). Fast 2-day wireless setup.

Clinic & CA Professional Suite — Rs 3,499 / month
Biz Fibre 300 (P02) + Google Workspace Email (P16) + Cloud Backup 1TB (P17) + Secure Wi-Fi. 99.9% uptime for patient/tax records.

Multi-Site Retail Pro — Rs 7,999 / month
Biz Fibre 1G (P03) + SD-WAN (P10) + 4x Cloud CCTV (P23) + Managed Firewall (P21). Centralized dashboard across stores.

Modular 1-Click Toggles: Owners toggle add-ons (extra SIMs, CCTV) with instant price updates — ZERO 5-day quote wait!

Smart KYC: Zero-Friction Verification & DPDP Compliance

1. Instant Registry APIs (Zero Manual Typing)

- **Mock GSTIN Registry API**
  Validates 15-char format (with 'X' check). Auto-populates Legal Name, Trade Name, Registered Address, and Active/Cancelled status in <500ms.
- **Mock Udyam Registry API**
  Validates 'UDYAM-XX-00-XXXXXXX' structure. Auto-verifies MSME enterprise classification (Micro, Small, Medium).
- **Direct Value**
  Eliminates 94 dropouts caused by missing or misplaced registration documents.

2. Automated OCR & Fraud Engine (Cross-Field Validation)

- **Signatory ID Parsing**
  Extracts Name, Photo, and ID number from PAN/Aadhaar/Voter ID with fuzzy match against registry authorized signers.
- **Address Proof Verification**
  Parses Electricity/Utility bills. Automatically verifies installation address matches bill within 90-day validity rule (anchor: 15-Jul-2026).
- **Rejection Catchers**
  Instantly detects expired bills, mismatched entity names, or suspended GST status before dispatch.

3. DPDP Act, 2023 Compliance (Privacy-by-Design)

- **Explicit Bilingual Consent**
  Granular, unbundled consent modal in the customer's language before camera/document capture.
- **Strict Data Minimization**
  Collects solely statutory DoT telecom parameters. Zero hoarding of bank statements or unrelated financial files.
- **PII Masking & Purging**
  PAN and Aadhaar numbers masked in logs/UI (e.g. 27AAAAA****1ZX). Raw documents encrypted at rest (AES-256) and purged post-verification.

Technical Architecture & Channel Partner Co-Pilot Model

1. FULL-STACK TECHNICAL ARCHITECTURE

- **Experience Layer (React / WhatsApp Bot)**
  Mobile-responsive PWA and automated WhatsApp conversational flow with voice/text regional processing.
- **Intelligence Layer (LLM + Rule Engine)**
  Gemini/LLM intent parser integrated with Product Catalog Rule Engine enforcing tier, size & dependency constraints.
- **Verification Layer (Registry + OCR Pipeline)**
  FastAPI microservices connecting to Mock GSTIN/Udyam registries and Tesseract/Vision OCR parser with DPDP redaction.
- **Telecom Fulfillment Layer (OMS & Tracker)**
  Order Management System with automated fiber feasibility checks and real-time SLA milestone tracking.

2. CHANNEL PARTNER 'CO-PILOT' SYNERGY

- **No Channel Conflict: Assisted Digital Mode**
  Empowers Airtel's 10,000+ DTH/broadband partners and field sales reps with an 'Assisted Tablet Mode' to onboard merchants in 10 minutes at their doorstep.
- **Dynamic QR Codes & Instant Attribution**
  Merchants scanning partner QR codes automatically credit the commission to the local agent upon digital KYC approval.
- **Abandoned Lead Rescue Engine**
  Leads dropping out during self-serve advisor or cart stages appear in the local partner's mobile dashboard with a propensity score for immediate warm follow-up.
- **Slashes Field Sales CAC by 70%**
  Transforms costly, slow field visits (Rs 24,335 CAC) into high-velocity digital closures under Rs 4,000 CAC.

Business Impact, Unit Economics & Phased Rollout Roadmap

Lead Conversion
7.36% -> 22.0%
+200% lift via 1-click pricing

Activation TAT
17.6d -> 3.5 Days
-80% via instant registry KYC

Blended CAC
Rs 15,000 -> Rs 3,800
-75% via digital self-serve

Chase Calls
3.0 -> <0.2 Calls
-93% via real-time tracker

TRANSFORMATIVE UNIT ECONOMICS

- **CAC Payback Period:**
Drops from 6.0 months (Rs 15,000 / Rs 2,500 ARPU) to 1.5 months (Rs 3,800 / Rs 2,500 ARPU).
- **LTV / CAC Ratio:**
Jumps from 2.1x to 7.8x driven by multi-product bundling and churn reduction from 15.2% to <6%.
- **Incremental Quarterly Revenue:**
Capturing 1,100 activations/quarter vs 368 yields +Rs 6.1 Crore incremental annualized B2B revenue.

3-PHASE EXECUTION ROADMAP

- **Phase 1: Pilot Launch (M1-M3)**
Deploy Web & WhatsApp advisor in 5 top Tier 1 cities (NCR, Mumbai, Bengaluru, Hyderabad, Chennai) targeting Kirana & Clinic segments.
- **Phase 2: Regional Scale (M4-M6)**
Scale to 25 Tier 2 industrial hubs. Enable regional voice advisor (Tamil, Telugu, Marathi). Onboard 5,000 channel partners on Assisted Mode.
- **Phase 3: Ecosystem Expansion (M7-M12)**
Integrate Airtel Cloud Marketplace for 3rd-party MSME SaaS apps (Tally on Cloud, Zoho Books, CCTV analytics).
